

MaywaDenki Live Performance

Bamboo course

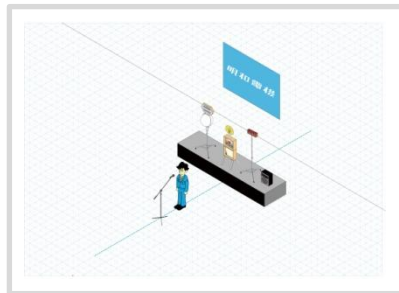

明和電機

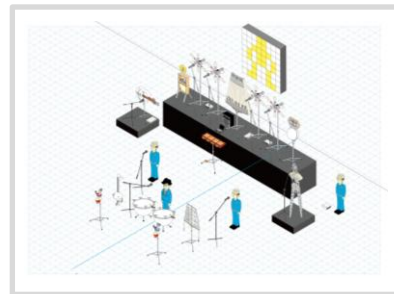

Live performance Since all of the musical instruments of Maywa Denki are tools or machines, the fun of playing them can be conveyed to the public only through product demonstration, in which how to use them is introduced. We refer to the demonstration as live performance, in which President and workers sing and dance to musical instruments automatically controlled by computers. In addition to electric music instruments, various robots and a character dressing up as President appear in our performances one after another. Currently, our live performances are held not only in Japan but also in Europe, the U.S. and other Asian countries, acquiring a good reputation.

Classification of performances by Maywa Denki: “PINE “BAMBOO”and “PLUM)” Courses
